

**EXCLUSIVE TO
GEM CABLE SOLUTIONS**

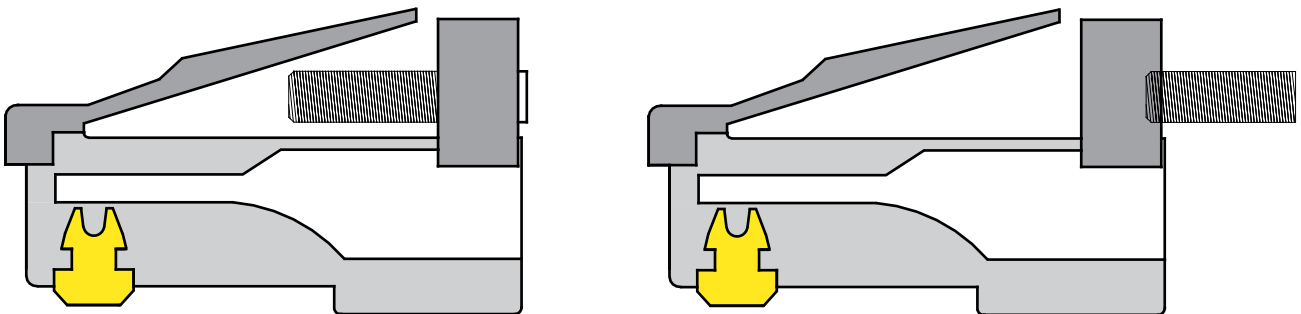

Applications:

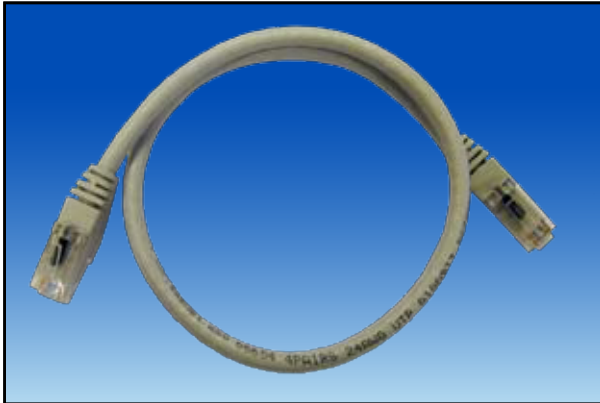

- Network Cameras
- Patch panels
- Machines in public areas
- Hotel rooms
- Internet connections
- Network printers
- Conference rooms
- Alarm systems
- Servers
- Critical points in your network

Make sure your Cat 5e/6 Cable never gets disconnected by mistake.

Lock your network jacks with RJ Lock for increased safety.

A locking screw is manually placed under the original lock pin to prevent it from being pressed down –the connector is locked. Unlock it, turn the locking screw counter clockwise with the tool into the position off the second picture and now you can press down the lock pin. And the connector may now be disconnected.

Cat 6 RJ45 Lockable Patch Lead

RJ45 Block

Complicates insertion of vacant sockets.
We have received calls from many companies that have problems with unauthorised use of vacant sockets on their networks.

With RJ45 Block plugged, you can not access the socket without the right tools.

RJ45 Cover With Sealing

Tamper Proof RJ45 - Gives you immediate indication of unauthorised access to your network cables.

RJ45 connector Cat6, UTP Lockable

Unterminated RJ45 Connector
Gives you the possibility to make your own
Lockable RJ45 Patch Lead
