

Accessories - Tooling

LC Switchable Tool

The LC Switchable Tool allows polarity change within an LC connector out in the field, having the ability to switch from A ~ A to A ~ B.

MTP® Housing Removable Tool

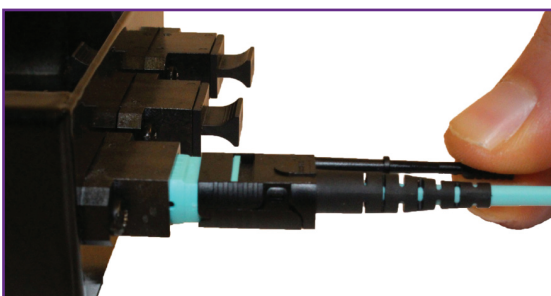

The MTP® Housing Removable Tool allows for easy and efficient polarity change out in the field. Instructions of use:

1. Insert MTP® assembly into tool until it latches in place
2. Squeeze extractor pins together
3. With extractor pins squeezed together, grasp boot/spring push assembly and remove from housing

MTP® Loopback

- MTP loopbacks are specially designed for testing of MPO parallel links
- By creating a loop of signal from transceiver to receiver within one MPO plug it forms optical link which allows testing of optical network segment by segment.
- The MTP Loopback Casing utilizes the novel MTP Push-Pull Tab mechanism to provide for a simple elegant method to encapsulate optical fibers in loopback test assemblies.

MTP® Push-Pull Tab

- The Push-Pull Tabs greatly simplify the use of MPO connectivity when manual access to the release slider.
- Rear portion of the connector is restricted.
- This Accessory enables easy insertion and extraction of MTP® brand plugs in dense applications by providing a flexible extension tab which can be used to extract as well as insert the plug into the adapter port.
